

## Table of Contents

### **PART I. OXIDANTS AND ANTIOXIDANTS: TOGETHER FOR LIFE**

#### **Chapter 1. Oxidation-reduction (redox) reactions**

#### **Chapter 2. Oxidants**

##### 2.1. Chemical nature and biological functions

###### 2.1.1. Free oxygen radicals

Hydroxyl radical

Superoxide anion (superoxide, superoxide radical)

Hydroperoxyl radical (peroxyl radical)

###### 2.1.2. Nitrogen free radicals

Nitrogen oxide

###### 2.1.3. Non-radical reactive oxygen species (ROSs)

Singlet oxygen Ozone

Hydrogen peroxide

##### 2.3. Generation of oxidizing agents

##### 2.4. Oxidative stress

##### 2.5. Redox balance

#### **Chapter 3. Antioxidants**

##### 3.1. How antioxidants work

##### 3.2. Antioxidant system

##### 3.3. Endogenous antioxidants

###### 3.3.1. Enzyme antioxidants

Superoxide dismutase

Catalase

Glutathione peroxidase

NADPH quinone reductase

Thioredoxin system

###### 3.3.2. Low molecular weight antioxidants

Glutathione

Ubiquinone (coenzyme Q10)

Uric acid

Melatonin

Melanin

Carnosine

###### 3.3.3. Other antioxidants

##### 3.4. Skin antioxidant activity

### **PART II. OXIDATIVE STRESS AND SKIN**

#### 1.1. Inflammatory skin disorders

##### 1.1.1. Acne

##### 1.1.2. Seborrheic dermatitis

##### 1.1.3. Rosacea

##### 1.1.4. Atopic dermatitis

##### 1.1.5. Contact dermatitis

##### 1.1.6. Nettle rash

#### 1.2. Skin and hair autoimmune disorders

- 1.2.1. Psoriasis
- 1.2.2. Vitiligo
- 1.2.3. Alopecia areata
- 1.3. Skin cancer
- 1.4. Wound healing and skin regeneration
- 1.5. Skin aging

### **PART III. ANTIOXIDANTS IN SKINCARE PRODUCTS**

#### **Chapter 1. Most common cosmetic antioxidants**

- 1.1. Vitamins
  - 1.1.1. Vitamin E and tocopherols
  - 1.1.2. Vitamin C
  - 1.1.3. Vitamin A and carotenoids
  - 1.1.4. B vitamins and niacinamide
- 1.2 Minerals
  - 1.2.1. Selenium (Se)
  - 1.2.2. Zinc (Zn)
  - 1.2.3. Copper (Cu)
- 1.3. Endogenous antioxidants
  - 1.3.1. Glutathione
  - 1.3.2. Ubiquinone (coenzyme Q10)
  - 1.3.3.  $\alpha$ -Lipoic acid (thioctic acid)
  - 1.3.4. Carnosine
- 1.4. Plant polyphenolic antioxidants
  - 1.4.1. Phenolic acids
  - 1.4.2. Catechins
  - 1.4.3. Isoflavones
  - 1.4.4. Silymarin
  - 1.4.5. Curcumin
  - 1.4.6. Quercetin and rutin
  - 1.4.7. Resveratrol
  - 1.4.8. Tannins
- 1.5. Other popular plant antioxidants
  - 1.5.1. Arbutin
  - 1.5.2. Azelaic acid
  - 1.5.3. Kojic acid
  - 1.5.4. Mannitol
- 1.6. Plant extracts
  - 1.6.1. Maritime pine bark extract (pycnogenol)
  - 1.6.2. Grape seed extract
  - 1.6.3. Acai berry extract
  - 1.6.4. Green tea leaf extract
  - 1.6.5. Ginkgo biloba leaf extract
  - 1.6.6. Peach flower extract
- 1.7. Synthetic antioxidants
  - 1.7.1. Low molecular weight antioxidants
  - 1.7.2. Fullerenes

## **Chapter 2. Antioxidant cosmetics features**

- 2.1. Role of antioxidants in skincare
- 2.2. Art of antioxidant formulation
  - 2.2.1. Chemical protection and stabilization
  - 2.2.2. Physical protection
  - 2.2.3. Reduction potential modification
  - 2.2.4. Protection by additional substances
  - 2.2.5. Moderate antioxidants concentration
  - 2.2.6. Packaging
- 2.3. Algorithm for choosing antioxidant cosmetics
  - 2.3.1. Check the presence of several antioxidants
  - 2.3.2. Check the content of auxiliary substances, protecting the product itself from oxidation
  - 2.3.3. Pay attention to the package
  - 2.3.4. Ask for test results
- 2.4. Cosmetic applications of antioxidant
  - 2.4.1 Daycare and sun protection
  - 2.4.2 Anti-age
  - 2.4.3. Pre- and post-treatment
  - 2.4.4. Skin lightening

## **Chapter 3. Topical antioxidants in a complex skin therapy**

- 3.1. Good barrier = healthy skin = beautiful skin
- 3.2. Key ingredients in corneotherapy cosmetics
  - 3.2.1. Barrier lipids
  - 3.2.2. Antioxidants
  - 3.2.3. Hyaluronic acid
- 3.3. Practical recommendations

## **PART IV. ANTIOXIDANT NUTRACEUTICALS FOR SKIN HEALTH**

- 1.1. Most common systemic antioxidants
- 1.2. Dangers of restorative stress
- 1.3. Photoprotective properties of systemic antioxidants
