

Table of Contents

Part I. BIOLOGY OF HAIR

1.1. Hair structure

1.1.1. Hair follicle

1.1.2. Hair shaft

Chemical bonds

Cuticle, a protective sheath of the hair shaft

Cortex, a layer responsible for mechanical properties of hair

Medulla and insulating properties of hair

1.1.3. Hair barrier system

1.2. Hair growth

1.3. Hair color (Albanova V.I.)

1.4. Hair shape and ethnicity differences

1.5. Microbiome of a healthy scalp

1.6. Neuroendocrine regulation of hair growth (Tkachev V.P., Sharova A.A.)

1.6.1. Sex hormones Androgens

Estrogens

Progesterone

1.6.2. Thyroid hormones and thyroid- stimulating hormone

Thyroid hormones

Thyroid-stimulating hormone (TSH)

1.6.3. Prolactin

1.6.4. Hypothalamic-pituitary-adrenal axis hormones

1.6.5. Insulin and insulin-like growth factors

1.6.6. Vitamin D

1.6.7. Thymus peptides

1.6.8. Skin neurotransmitters

Part II. CAUSES OF HAIR DISORDERS

Chapter 1. Hair aging

1.1. Chronological aging (Albanova V.I.)

1.1.1. Hair graying

1.1.2. Age-related hair deterioration

1.1.3. Age-related hair thinning

1.2. Hair premature aging factors

1.2.1. Sunlight

1.2.2. Pollutants

1.2.3. Smoking

Chapter 2. Hair-damaging treatments

2.1. Hair coloring

2.1.1. Lighteners

2.1.2. Dyes

2.1.3. Negative effects of dyes

2.2. Chemical perming and straightening of hair

2.2.1. Chemical perming

2.2.2. Chemical straightening

- 2.2.3. The dangers of chemical perming and straightening
- 2.3. Heat perming, styling, and straightening
- 2.4. Hair extensions

Chapter 3. Hair shaft abnormalities

Chapter 4. Hair loss

- 4.1. Androgenetic alopecia
- 4.2. Alopecia areata
- 4.3. Diffuse hair loss
 - 4.3.1 Telogen hair loss
 - 4.3.2. Anagen hair loss
- 4.4. Diseases cause hair loss

PART III. HAIR ANALYSIS (Barunova N.G.)

- 1.1. Health assessment for preliminary diagnosis
- 1.2. Trichology methods
 - 1.2.1. Trichoscopy
 - 1.2.2. Phototrichogram
 - 1.2.3. Clinical photography

PART IV. COSMETIC PRODUCTS AND METHODS FOR BASIC HAIR CARE

Chapter 1. Cosmetic hair care products

- 1.1. Shampoos
 - 1.1.1. Mechanism of action
 - 1.1.2. Ingredients in hair care formulations
 - Cleansing ingredients
 - Conditioning agents
 - Special additives
 - Refatting agents
 - Anti-foaming agents
 - Thickeners and clouding agents
 - Chelating agents
 - pH regulators
 - Preservatives
 - 1.1.3. Therapeutic shampoos
 - 1.1.4. Dry shampoos
 - 1.1.5. How to choose the right shampoo
 - 1.1.6. Adverse reactions
- 1.2. Conditioners
 - 1.2.1. Mechanism of action
 - 1.2.2. Ingredients in the conditioner formula
 - Silicones
 - Polyquaternions
 - Keratin and natural polymers
 - Other ingredients
 - Non-washable conditioners
 - 1.2.3 How to choose the right conditioner
- 1.3. Balms
- 1.4. Styling and fixing products
 - 1.4.1. Polymers as the base for styling products

1.4.2. Special additives

Chapter 2. Dermatology chemical peel for the scalp (Khaldina M.V.)

2.1. Formula features

2.2. General recommendations for the peel procedure

2.3. Legislative aspects

Chapter 3. Injectable hair treatment

3.1. Mesotherapy

3.2. PRP therapy

3.2.1. PRP composition and biological effect

3.2.2. Indications and contraindications for using PRP in trichology

Chapter 4. Physical methods to improve hair (Khaldina M.V.)

4.1. Light therapy

4.1.1. Visible light therapy (380–780 nm)

4.1.2. Ultraviolet therapy (100–400 nm)

4.1.3. Infrared therapy (780 nm – 1 mm)

4.1.4. Low-level laser therapy

4.2. Electrotherapy

4.2.1. Galvanization

4.2.2. Darsonvalization

4.2.3. Microcurrent therapy

4.2.4. Percutaneous electro neurostimulation

4.3. Other methods

4.3.1. Gas-liquid peel

4.3.2. Oxygen-ozone therapy

Chapter 5. Nutrition and hair

5.1. Probable causes of nutrient deficiencies associated with hair loss

5.2. Nutrients that affect hair growth

5.2.1. Iron

5.2.2. Zinc

5.2.3. Niacin

5.2.4. Fatty acids

5.2.5. Selenium

5.2.6. Vitamin D

5.2.7. Vitamin A

5.2.8. Vitamin E

5.2.9. Folic acid

5.2.10. Biotin

5.2.11. Amino acids and proteins

5.2.12. Antioxidants

5.3. Nutrients toxicity

5.4. Probiotics and prebiotics

PART V. COSMETIC HAIR CARE FOR SOME SCALP PATHOLOGIES

Chapter 1. Sensitive scalp: strategy of diagnosis and treatment (Gadzhigoroyeva A.G., Romanova Yu.)

1.1. Etiology and pathogenesis

1.2. Diagnostics

1.3. Treatment

Chapter 2. Seborrhea and dandruff (Khaldina M.V., Barunova N.G.)

2.1. Role of *Malassezia* in dandruff (Albanova V.I.)

2.2. Dandruff treatment

2.2.1. Local therapy

2.2.2. General therapy

2.2.3. Topical therapy

2.2.4. Oxygen-ozone therapy

2.2.5. Dermatology peel

2.3. Restoration of skin protective function

2.3.1. Restoring the integrity of the skin's natural protective barrier

2.3.2. Misconceptions about dandruff treatment

2.4. Hair care products for dandruff and seborrheic dermatitis

Chapter 3. Psoriasis of the scalp (Albanova V.I.)

3.1. Classification

3.2. Principles of therapy
