

Table of Contents

Part I. THEORY FUNDAMENTALS

Chapter 1. Laser physics

- 1.1. The nature of light
- 1.2. Definition and properties of laser light
- 1.3. Lasers in dermatology and aesthetic medicine
- 1.4. Laser devices
- 1.5. Properties of laser light
- 1.6. Parameters of laser light
 - 1.6.1. Wavelength
 - 1.6.2. Energy density (fluence) and power
 - 1.6.3. Exposure duration and mode (pulsed or continuous)
 - 1.6.4. Light spot and focused energy
 - 1.6.5. Types of lasers

Chapter 2. Light–skin interactions

- 2.1. Skin targets
- 2.2. Principles of laser action
- 2.3. Selective photothermolysis
- 2.4. Non-selective photothermolysis
 - 2.4.1. Laser resurfacing
 - 2.4.2. Fractional photothermolysis

Chapter 3. Intensive pulsed light (IPL)

Chapter 4. Low-intensity laser therapy (LLLT)

Chapter 5. Photodynamic therapy (PDT)

References

Part II. PRACTICAL SKILLS

Chapter 1. Laser rejuvenation

- 1.1. Principles of light therapy (Sheptiy O.V.)
- 1.2. Features of ablative and non-ablative fractional rejuvenation
- 1.3. Key parameters of laser rejuvenation
- 1.4. Devices for laser rejuvenation
- 1.5. Photorejuvenation (IPL)

References

Chapter 2. Laser removal of neoplastic skin lesions

References

Chapter 3. Lasers in the treatment of vascular skin lesions (Sheptiy O.V.)

- 3.1. Diagnostics of the vascular lesions of the skin
- 3.2. Principles of light therapy
- 3.3. Key parameters of vascular lasers
- 3.4. Devices for vascular lesions treatment
- 3.5. Factors influencing the results of laser treatment of vascular lesions
- 3.6. Practical recommendations
- 3.7. Recommendations for laser treatment of specific vascular pathologies
- 3.8 Laser therapy and rosacea (Urakova D.S., Kalashnikova N.G.)
 - 3.8.1. Algorithm of rosacea treatment

- 3.8.2. Vascular abnormalities treatment
- 3.8.3. Connective tissue treatment
- 3.8.4. Lasers for skin remodeling

References

Chapter 4. Lasers in the treatment of pigmented skin lesions

- 4.1. Diagnosis of pigmented skin lesions
- 4.2. Principles of light therapy
- 4.3. Devices for pigmented skin lesions treatment
- 4.4. Effectiveness of laser treatment
- 4.5. Laser treatment of hypopigmentation

References

Chapter 5. Lasers in the scar revision (Kalashnikova N.G.)

- 5.1. Diagnostics of scars
- 5.2. Principles of light therapy
- 5.3. Devices for scar treatment
 - 5.3.1. Laser photocoagulation of the vessels
 - 5.3.2. Laser resurfacing
 - 5.3.3. Fractional photothermolysis
 - 5.3.4. Laser removal of hyperpigmentation
- 5.4. Algorithm of laser scar removal
- 5.5. When to start the scar therapy?
- 5.6. Comprehensive approach to scar treatment

References

Chapter 6. Lasers in the therapy of acne and other inflammatory dermatoses

- 6.1. Principles of light therapy (Kalashnikova N.G.)
- 6.2. Devices for acne therapy
- 6.3. Lasers and retinoids in acne
- 6.4. Peculiarities of laser treatment of psoriasis (Kalashnikova N.G., Urakova D.S.)
- 6.5. Laser treatment of onychomycosis

References

Chapter 7. Laser removal of tattoos (Kalashnikova N.G.)

- 7.1. Principles of laser action
- 7.2. Devices for tattoo removal
- 7.3. Key parameters influencing the efficiency of laser tattoo removal
- 7.4. Factors that complicate laser tattoo removal
- 7.5. Factors that limit the success of laser tattoo removal
- 7.6. Care of the tattoo area after treatment
- 7.7. Complications of laser tattoo removal
- 7.8. Laser tattoo removal upgrade

References

Chapter 8. Lasers and IPL for hair removal

- 8.1. Principles of light therapy
- 8.2. Hair and skin features to be considered in photo epilation
- 8.3. Key parameters of lasers and IPL devices for hair removal
- 8.4. Laser and photo epilation devices
 - 8.4.1. Lasers

- 8.4.2. Broad-spectrum IPLs
- 8.5. Hormonal status in laser and photo epilation
 - 8.5.1. Hirsutism
 - 8.5.2. Hyperprolactinemia
- 8.6. Contraindications for laser and photo epilation
- 8.7. Side effects of laser and photo epilation

References

Chapter 9. Laser-assisted lipolysis

- 9.1. Invasive laser lipolysis
- 9.2. Non-invasive laser lipolysis

References

Chapter 10. Laser-assisted transdermal delivery of active substances

References

Chapter 11. Lasers and dermal fillers

References

Chapter 12. Laser complications (Kalashnikova N.G.)

- 12.1. Mistakes in the patient selection
- 12.2. Wrong choice of laser device
- 12.3. Incorrect parameters for laser light
- 12.4. Failure to follow the protocol
- 12.5. Inadequate post-procedure care
- 12.6. Individual response to the laser radiation

References

- 1.3.5. Laser removal of tattoos and permanent makeup
- 1.4. First aid basics
- 1.5. Careful choice of equipment

References

Chapter 2. Buying a laser (Sheptij O.V.)

- 2.1. Areas of application of lasers in dermatology and aesthetics
- 2.2. Parameters to be considered
- 2.3. Spa & wellness centers
- 2.4. Small medical aesthetic clinics
- 2.5. Medium-sized medical aesthetic centers
- 2.6. Dermatology and aesthetic clinics with a focus on clinical and aesthetic dermatology and plastic surgery
- 2.7. Laser medical clinics
- 2.8. Problems associated with the use of lasers
- 2.9. Optimization of laser centers operation

References

Chapter 13. Laser treatment pre- and post-care

- 13.1. Prevention of infectious complications
- 13.2. Prevention of aesthetic complications

References

Part III. ORGANIZATIONAL ASPECTS

Chapter 1. Lasers and workplace (Dudkina S.G.)

- 1.1. How to operate safely with lasers and IPL

- 1.2. General precautions
- 1.3. Additional precautions
 - 1.3.1. Fractional laser thermolysis, laser resurfacing
 - 1.3.2. Laser photocoagulation of vessels
 - 1.3.3. Carbon peel
 - 1.3.4. Photodynamic therapy
 - 1.3.5. Laser removal of tattoos and permanent makeup
- 1.4. First aid basics
- 1.5. Careful choice of equipment

References

Chapter 2. Buying a laser (Sheptij O.V.)

- 2.1. Areas of application of lasers in dermatology and aesthetics
- 2.2. Parameters to be considered
- 2.3. Spa & wellness centers
- 2.4. Small medical aesthetic clinics
- 2.5. Medium-sized medical aesthetic centers
- 2.6. Dermatology and aesthetic clinics with a focus on clinical and aesthetic dermatology and plastic surgery
- 2.7. Laser medical clinics
- 2.8. Problems associated with the use of lasers
- 2.9. Optimization of laser centers operation

References
