Introduction	12

PART I

BOTULINUM TOXIN — THERE'S ONLY ONE! THE BASICS OF BOTULINUM THERAPY

Chapter 1. The nature of botulinum toxin.....	18
1.1. Structure of botulinum toxin.....	18
1.2. Mechanism of chemical denervation	19
1.2.1. BoNT penetration and activation in the nerve cell	19
1.2.2. Blockade of signal transmission from nerve ending to muscle.....	20
1.3. Restoration of innervation	24
Chapter 2. Factors that determine the botulinum therapy effectiveness	26
2.1. Frequently asked questions about the effectiveness of BoNT drugs.....	26
2.1.1. Why is BoNT type A used in medicine?.....	26
2.1.2. What does the area of denervation depend on?	26
2.1.3. How long does the effect last after the BoNT administration?	27
2.1.4. Which commercial BoNT product is the most effective?	27
2.2. Insensitivity to botulinum toxin.....	29
2.2.1. Primary insensitivity	29
2.2.2. Secondary insensitivity	30
2.2.3. Immune resistance to BoNT.....	30
2.3. Adequate assessment of indications and contraindications	31

Chapter 3. Botulinum therapy in the face and neck	36
3.1. Prevention and reduction of dynamic wrinkles	36
3.2. Smoothing the skin surface	38
3.3. Harmonious weakening of the tonus of the whole muscle or its portion.....	38
3.4. Restoring the balance between agonist and antagonist muscles	39
3.5. Changes in facial volume and proportions	40
Chapter 4. Safety of botulinum therapy	41
4.1. Contraindications to botulinum therapy	41
4.2. Adverse events and complications.....	42
4.3. Some unfounded fears and concerns about botulinum therapy.....	43
4.3.1. Can I get botulism after botulinum therapy?	44
4.3.2. Can botulinum toxin be injected into any muscle?	44
4.3.3. Can botulinum therapy be given to pregnant women?	45
4.3.4. Are there age restrictions for botulinum therapy?	45
4.3.5. Is there a non-injectable alternative to botulinum therapy?.....	47
Résumé	48

PART II

THE PARADOXES OF AESTHETIC BOTULINUM THERAPY

Chapter 1. Positive effects of long-term botulinum therapy	53
1.1. Reducing expression lines.....	54
1.2. Changing skin quality.....	55
1.3. Preventing age-related facial structure changes	56
1.4. Lifting.....	58
1.4.1. Working with levators.....	58
1.4.2. Working with depressors	58
1.5. Volumetric transformation of muscles	61
1.6. Eliminating negative expression stereotypes	63
1.7. Indirect positive influence on the emotional state	64

Chapter 2. The other side of the coin: "side" effects of aesthetic botulinum therapy	65
2.1. Wrinkle appearance or aggravation	65
2.2. Compensatory mechanisms	67
2.2.1. Activation of antagonist muscles.....	69
2.2.2. Activation of additional muscles.....	70
2.2.3. Activation of individual portions within a single muscle.....	71
2.3. Changes in facial expression patterns.....	72
2.4. Changes in the emotional response	73
Résumé	74

PART III

BOTULINUM TOXIN AND SKIN HEALTH

Prospective areas of research on the use of BoNT/A in cosmetic dermatology and aesthetic medicine	78
---	----

Chapter 1. Rosacea	79
---------------------------------	-----------

1.1. Pathogenetic targets for BoNT	79
1.2. Mechanism of BoNT action	83
1.3. Clinical effects	84
Résumé	86

Chapter 2. Skin healing and scarring	88
---	-----------

2.1. Normal and pathological scarring	88
2.1.1. Stages of wound healing.....	88
2.2.2. Pathologic scars.....	89
2.2. Mechanism of action	91
2.3. Histological studies.....	93
2.4. Clinical observations.....	95
2.4.1. Wound healing and scar prevention	95
2.4.2. Scar revision.....	96
Résumé	97

Chapter 3. Pigmentation	99
3.1. Effect of BoNT on melanogenesis	99
3.1.1. Study design	99
3.1.2. Results	100
Impact on melanocyte proliferation and the number of their dendrites	100
BoNT/A uptake by melanocytes and keratinocytes	100
Impact on melanin content and tyrosinase activity in human epidermal melanocytes	101
Impact on UVB radiation-induced skin pigmentation in mice	102
Impact on the number of DOPA-positive melanocytes in mouse skin	102
Impact on melanin content and tyrosinase activity <i>in vivo</i>	102
Impact on the concentration of mediators regulating inflammation	103
3.2. Is botulinum toxin a skin protector against UV-induced pigmentation?	104
3.3. Topical botulinum toxin application for skin lightening: rationale and practical recommendations	105
Résumé	106
Chapter 4. Oily skin	107
4.1. Mechanism of action	107
4.2. Clinical effects	108
Résumé	109
Chapter 5. Hyperhidrosis	110
5.1. Mechanism of action	113
5.2. Clinical aspects	113
Résumé	115
Chapter 6. Hair loss	116
6.1. Androgenetic alopecia	116
6.2. Trichotillomania	117
Résumé	118

PART IV
COMBINING BOTULINUM THERAPY
WITH AESTHETIC TREATMENTS

Chapter 1. Botulinum therapy and energy-based modalities	121
1.1. Aims of physiotherapy in combination with botulinum therapy	121
1.2. Energy-based treatments affect the intensity and duration of BoNT-assisted myorelaxant effect	122
1.2.1. Electromyostimulation	123
1.2.2. Microcurrent therapy	125
1.2.3. Galvanization and iontophoresis	126
1.2.4. Low-intensity pulsed magnetic therapy	127
1.2.5. Ultrasound therapy	128
1.2.6. Low-level laser (light) therapy	129
1.2.7. Mechanical stimulation	130
1.2.8. Thermal stimulation	130
1.2.9. Other physical modalities	131
Résumé	132
Chapter 2. Botulinum therapy and aesthetic injections	134
2.1. BoNT and hyaluronic fillers	134
2.1.1. Upper third of the face	135
Horizontal wrinkles on the forehead	136
Vertical creases in the interbrow area	137
Horizontal line at the bridge of the nose	138
Eyebrows	138
2.1.2. Mid-face area	139
"Crow's feet"	139
Fine lines on the cheeks	139
Furrows in the suborbital area	140
Volume loss in the cheek and cheekbone region	140
Nose shape	140

2.1.3. Lower third of the face.....	141
Lip shape	141
Perioral wrinkles	141
"Marionette" wrinkles.....	141
Lowered corners of the mouth.....	142
Face contour	142
2.1.4. Neck	143
2.2. Can botulinum therapy and filler contouring be performed in one session?	143
2.3. BoNT and other injectable preparations	144
Résumé	146

PART V

"BOTOX-LIKE" SKINCARE PRODUCTS

1.1. Mimicking the action of botulinum toxin.....	149
1.2. Topical botulinum toxin.....	152
Résumé.....	155
References	156
