List of abbreviations.....	10
Introduction	12

PART I

BIOLOGY AND PHYSIOLOGY OF ADIPOSE TISSUE

Chapter 1. Subcutaneous adipose tissue	14
1.1. Body fat depots	14
1.2. Adipocyte: the primary cell of adipose tissue	15
1.2.1. Origin	16
1.2.2. Types of adipocytes	18
White adipocytes	18
Brown adipocytes.....	19
Beige adipocytes.....	19
Pink adipocytes.....	19
Yellow adipocytes.....	20
1.2.3. Distribution of adipocytes.....	20
1.3. Fat metabolism	22
1.3.1. Triglycerides: the primary component of fat	22
1.3.2. Lipogenesis and lipolysis: the two sides of fat metabolism	23
1.4. Other cells of adipose tissue	24
1.5. Adipose tissue as an endocrine organ	26
1.6. Aging of adipose tissue	26
1.7. Aesthetic problems related and not related to SAT	27
Chapter 2. Cellulite	29
2.1. Causes of cellulite	30
2.2. Stages and symptoms	32

Chapter 3. Obesity: What to expect in the skin?34

3.1. Skin pathophysiology in obesity	36
3.1.1. Skin barrier	36
3.1.2. Sebaceous glands	37
3.1.3. Sweat glands	37
3.1.4. Collagen and wound healing	38
3.1.5. Microcirculatory bed	38
3.2. Obesity and skin diseases	38
3.2.1. Dermatoses	40
3.2.2. Skin infections	40
3.2.3. Metabolic disorders	42
3.3. Common skin manifestations in obesity	42
3.4. Obesity and rare skin conditions	43

PART II

COMMON APPROACHES TO SUBCUTANEOUS ADIPOSE TISSUE REMODELING

1.1. Scientific substantiation of lipolysis-stimulating strategies	48
1.2. SAT-targeted modalities	51
1.3. Selecting interventions based on the stage of cellulite	53
Stage 1	53
Stage 2	54
Stage 3	54
Stage 4	55

PART III

LIPOSUCTION

1.1. Suction-assisted lipectomy (aspiration liposuction)	57
1.2. Vibration-assisted liposuction (booster liposuction)	58
1.3. Radiofrequency-assisted liposuction	58
1.4. Laser-assisted liposuction	60
1.5. Ultrasound-assisted liposuction	60
1.6. Treatment of post-liposuction skin irregularities	61

PART IV
BODY-CONTOURING DEVICES AND PROCEDURES

Chapter 1. Mechanical technologies	65
1.1. Mechanotherapy: molecular and cellular mechanisms	66
1.1.1. Cell cytoskeleton and extracellular matrix	67
1.1.2. PIEZO channels: cellular mechanoreceptors	68
1.1.3. Tactile receptors: mechanoreceptors of the skin	69
1.2. Mechanotherapy technologies: variants and effects	72
1.2.1. Manual massage	72
1.2.2. Compression therapy	73
Pressotherapy	73
Shiatsu massage	74
1.2.3. Vibration therapy	75
1.2.4. Vacuum therapy (decompression)	76
1.3. Combined mechanotherapy	77
1.3.1. Vibrovacuum therapy: decompression + vibration	77
1.3.2. Vacuum-roller massage: decompression + kneading	78
1.3.3. Vibrocompression therapy	79
1.4. Future for mechanotherapy	81
Chapter 2. Electrical technologies	83
2.1. Basic characteristics of electric current	83
2.2. Interaction of electric current and biological tissue	86
2.2.1. Tissue conductivity	86
2.2.2. Thermal effects of electric current	87
Direct and low-frequency currents	87
High-frequency currents	88
2.2.3. Non-thermal effects of electric current	88
2.3. Electrotherapy technologies: variants and effects	89
2.3.1. Resistive technologies	89
Monopolar devices	90
Bipolar devices	91
Multipolar devices	92
2.3.2. Capacitive technologies	92
2.3.3. Inductive technologies	93
2.4. High-frequency therapy	94

2.4.1. Radiofrequency therapy (RF therapy)	94
RF-assisted liposuction	96
RF-assisted lipolysis	97
RF diathermy and electroporation	99
RF microneedling	100
2.4.2. Ultra-high frequency therapy (UHF therapy)	101
UHF therapy effects	102
UHF technologies	104
2.5. Electrolipolysis	106
2.6. Neuromuscular stimulation	108
2.6.1. Physiology of neuromuscular stimulation	111
2.6.2. Neuromuscular stimulation technologies: variants and effects	111
Current distribution with depth	112
Subjective sensations during the procedure	113
Guidelines for technology selection	113
2.6.3. Magnetic myostimulation	114
2.6.4. Electromyostimulation	116
2.7. Microcurrent therapy	117
2.8. Gel for electrotherapy procedures	119
Chapter 3. Sound technologies	121
3.1. Ultrasound therapy	121
3.1.1 Ultrasonic cavitation (low-frequency ultrasound)	122
Focused vs. non-focused delivery	123
3.1.2. Ultrasonic thermocoagulation (high-frequency ultrasound)	125
3.2. Extracorporeal shockwave therapy	128
3.2.1. Shockwave effects on SAT	128
3.2.2. Radial and focused shockwave therapy	130
3.2.3. Shockwave therapy in complex anti-cellulite programs ...	132
3.3. Gel for ultrasound and shockwave treatments	133
Chapter 4. Light technologies	135
4.1. Interaction of light with biological tissues	135
4.2. Laser lipolysis as an alternative to traditional liposuction	136
4.3. Laser lipolysis technologies: variants and effects	137

4.3.1. "Hot" laser lipolysis	137
Minimally invasive laser lipolysis and laser-assisted liposuction	139
Non-invasive laser lipolysis	140
4.3.2 "Cold" laser lipolysis	141
Chapter 5. Cryolipolysis	143
5.1. Historical background	143
5.2. Cryolipolysis technologies: variants and effects	145
5.2.1. Vacuum-assisted cryolipolysis	145
5.2.2. Contrast cryolipolysis	151
5.2.3 Cryolipolysis with plates	153
5.2.4. Electromyostimulation + cooling	153
5.3. Indications and contraindications	154
5.4. Factors affecting efficacy	155
5.4.1. Patient selection	156
5.4.2. Technical issues	156
Volume of cooled adipose tissue	156
Temperature in the exposure zone	157
Session duration	158
Number of treatments	158
Mechanical effects	158
5.5. Procedure	159
5.6. Undesirable phenomena and complications	160
5.6.1. Post-session reactions and complications	160
5.6.2. Paradoxical adipose hyperplasia	160
Frequency of occurrence	160
Causes	162
Risk factors	164
Chapter 6. Combined technologies	166

PART V

INJECTION TREATMENT

1.1. Improvement of microcirculation	170
1.2. Impact on adipose tissue	171

1.2.1. Physiologic regulation of lipolysis	171
1.2.2. Lipodestruction	176
Fat emulsification ("fat dissolution")	176
Hypotonic destruction of adipocytes	182
Injectable cryolipolysis	183
1.3. Skin thickening	185
1.3.1. Mesotherapy	185
1.3.2. Collagen therapy	186
1.4. Carboxytherapy	187

PART VI

ANTI-CELLULITE COSMETIC PRODUCTS

1.1. Active ingredients	193
1.1.1. Stimulation of lipolysis	193
1.1.2. Fat burning	193
1.1.3. Strengthening the collagen–elastin framework and improving the dermal structure	194
1.1.4 Reduction of edema, improvement of microcirculation ...	194
1.1.5. Anti-cellulite complexes	194
1.2. Professional cosmetic treatments	196
1.2.1. Thalassotherapy	196
1.2.2. Mud therapy	196
1.2.3. Wraps	197

PART VII

OTHER METHODS FOR BODY CONTOURING

1.1. Nutraceuticals	199
1.2. Drugs for blood sugar control and weight loss	200
1.3. Specialized clothing	202

Conclusion	203
