

Table of Contents

Abbreviations..... 10

PART I THEORETICAL BASIS

Chapter 1. Physics of laser radiation 13

1.1. The nature of light..... 13

1.2. Laser radiation..... 15

1.3. Lasers in dermatology..... 15

1.4. Principles of laser operation 17

1.5. Basic characteristics of laser radiation 19

1.6. Basic parameters of laser radiation 19

 1.6.1. Emission wavelength..... 20

 1.6.2. Energy density (fluence) and power..... 21

 1.6.3. Irradiation duration and mode (pulsed or continuous) 22

 1.6.4. Light spot and energy focusing 26

 1.6.5. Types of lasers 27

Chapter 2. Interaction of laser radiation with skin 29

2.1. Laser targets..... 29

2.2. Mechanisms of laser action 30

 2.2.1. Photothermal effect 32

 Non-selective photothermolysis..... 33

 Selective photothermolysis..... 33

 2.2.2. Photoacoustic (photomechanical) effect..... 33

 2.2.3. Photobiomodulation..... 34

2.3. Selective photothermolysis 34

2.4. Non-selective photothermolysis..... 36

 2.4.1. Laser resurfacing..... 38

 2.4.2. Fractional photothermolysis..... 40

Chapter 3. Intense pulsed light (IPL) 43

Chapter 4. Low-intensity laser therapy47

Chapter 5. Photodynamic therapy50

PART II
PRACTICAL SKILLS & CLINICAL EXPERIENCE

Chapter 1. Laser rejuvenation53

1.1. How skin rejuvenation lasers work 53

 1.1.1. Degradation reactions 54

 1.1.2. Reduction reactions 55

1.2 Features of ablative and non-ablative fractional rejuvenation 56

1.3. Treatment parameters 58

1.4. Laser equipment 59

1.5. Photorejuvenation 60

Chapter 2. Removing skin tissue61

Chapter 3. Vascular lesions64

3.1. Diagnosis 64

3.2. How do vascular lasers and IPL work 67

3.3. Important parameters of vascular lasers 68

 Wavelength 68

 Pulse duration 69

 Pulse frequency 70

 Spot size 70

 Cooling 70

3.4. Vascular lasers 71

3.5. Factors influencing the clinical results 72

 Dark phototype IV–V and tanned skin 72

 Vascular depth 73

 Blood flow velocity 73

 Biophysical factors 73

 Equipment 74

 Patient responsibility 74

3.6. Practical recommendations 75

3.6.1. Before the session	75
3.6.2. Basic principles of laser treatment.....	76
3.6.3. Post-session care.....	76
3.6.4. Adverse events and complications.....	77
3.7. Device of choice for different vascular lesions.....	79
Infantile hemangioma	79
Capillary angiodysplasia	79
Telangiectasias.....	80
Telangiectasias and venulectasias (phlebectasias) of the lower extremities	80
Poikiloderma of Civatte.....	82
3.8. Rosacea	82
3.8.1. Treatment strategy.....	83
3.8.2. Vascular lesions	84
Pulsed dye laser (PDL)	84
Potassium-titanium-phosphate laser (KTP).....	85
Neodymium laser (Nd:YAG).....	85
Intense pulsed light (IPL).....	85
3.8.3. Skin hypertrophy.....	86
3.8.4. Skin dystrophy	87
Chapter 4. Pigmentary disorders	88
4.1. Diagnosis.....	89
4.2. How dye lasers and IPL work.....	90
4.3. Appliances for the treatment of pigmentary disorders.....	91
Green light.....	93
Yellow light	94
Red light	95
Near-IR light	95
IPL	96
Laser resurfacing and fractional photothermolysis	97
4.4. Effectiveness of laser therapy.....	99
4.5. Laser therapy for hypopigmentation disorders	100

Chapter 5. Scars	102
5.1. Diagnosis.....	102
5.2. How lasers work when used for scar revision.....	104
5.3. Laser therapy for scars.....	105
5.3.1. Laser coagulation of vessels.....	105
5.3.2. Laser resurfacing.....	106
5.3.3. Fractional photothermolysis.....	106
5.3.4. Laser removal of hyperpigmentation in the scar area.....	107
5.4. Laser scar therapy.....	109
5.5. When to start scar therapy.....	110
5.6. Comprehensive approach to scar management.....	110
Chapter 6. Acne and psoriasis	112
6.1. How lasers and IPL work for acne.....	113
6.2. Phototherapy devices.....	114
KTP.....	114
Pulsed dye lasers (PDL).....	115
Infrared lasers.....	116
Intense pulsed light (IPL).....	116
Photodynamic therapy (PDT).....	117
Photopneumatic therapy.....	117
Ultraviolet therapy.....	118
6.3. Laser therapy and retinoids.....	118
6.4. Peculiarities of laser application in psoriasis.....	119
Chapter 7. Laser tattoo removal	123
7.1. How do tattoo removal lasers work?.....	123
7.2. Tattoo removal lasers.....	125
7.3. Parameters affecting the effectiveness of laser tattoo removal.....	126
7.4. Factors that complicate laser tattoo removal.....	128
7.5. Factors limiting laser tattoo removal.....	131
7.6. Skincare after laser tattoo removal.....	132
7.7. Complications of laser tattoo removal.....	133
7.8. What has been done to improve laser tattoo removal?.....	133

Chapter 8. Light-based epilation.....	137
8.1. How do laser and photoepilation work?.....	138
8.2. Important features of hair and skin during epilation	140
8.3. Important parameters of laser and IPL devices for hair removal.....	142
8.4. Laser and photoepilation devices.....	143
8.4.1. Lasers	143
8.4.2. IPL	148
8.5. Hormonal impact on laser epilation and photoepilation outcome.....	149
8.5.1 Hirsutism and hypertrichosis	149
8.5.2 Hyperprolactinemia	150
8.6. Contraindications for light-based epilation.....	150
8.7. Adverse effects associated with light-based epilation	151
Chapter 9. Laser lipolysis.....	153
9.1. Invasive laser lipolysis	153
9.2. Non-invasive laser lipolysis.....	155
Chapter 10. Laser-assisted drug delivery	157
Chapter 11. Lasers and hyaluronic fillers	158
Chapter 12. Complications associated with laser treatment.....	161
12.1. Mistakes in selecting patients for laser treatment.....	162
12.2. Improper selection of equipment	164
12.3. Incorrect laser parameters	165
12.4. Violation of procedure protocol	166
12.5. Inadequate post-procedure care	167
12.6. Individual reactions to laser radiation.....	168

PART III
ORGANIZATIONAL MATTERS

Chapter 1. Laser safety.....	171
1.1 Laser hazard classes	171
1.2 Health risks.....	176

1.3. How to ensure safe work with lasers in clinical practice	178
Instruction on the operation and safety rules when working with laser devices	179
1.4. General precautions for working with lasers	181
1.5. Additional precautions for laser procedures	182
1.5.1. Fractional laser thermolysis, "laser resurfacing"	182
1.5.2. Laser coagulation of vessels	183
1.5.3. Carbon peel	183
1.5.4. Photodynamic therapy	184
1.5.5. Laser removal of tattoos and permanent makeup	184
1.6. Basics of first aid	184
Instruction on the first aid for eye injury and skin with laser radiation	185
1.7. Home lasers	187
Chapter 2. Selecting a laser for the practice	188
2.1. Applications of lasers in dermatology and aesthetic medicine	188
2.2. What to look for when choosing laser equipment	191
2.3 Beauty salons, spa/wellness centers, skincare offices	193
2.4. Small medical centers	194
2.5 Medium-sized medical centers	195
2.6. Medical centers with mixed practice: skincare, dermatology, and plastic surgery	196
2.7. Centers of expert level	197
2.8. Challenges of laser-based practice	198
2.9. Optimization of laser center operation	199
